

Your Travel Centre is a **host agency** providing you with the technology, marketing and support you need to reach your full potential as an independent travel professional

A host agency is a flexible business model supporting home based agents in promoting their **own brand**, with their own **trading name, logo, email and website**.

Through this approach our agents are truly building **their own business**, with all the back office support needed to grow and prosper.

It's your business, your way. Find out why it's a better way.

Your own website - editable by you, updated for you

Setting up your own website can be time consuming in itself, but the real challenge is keeping it up to date. You simply don't have time, because information loaded just last week is quickly out of date or sold out. You won't have this problem with your fully personalised and editable website featuring information on all travel segments and latest deals, with the advantage of regular updates done for you. Refreshed banner adverts and exciting new products changed regularly without you having to lift a finger. You can edit almost every other detail of your site, including information pages, contact us, about us, logo, specials pages and more. You can even add brand new pages. It's flexible, functional and most importantly up to date and relevant to your customers.

Marketing done for you

Your most valued asset is your customer database. We help you maintain this important relationship through a regular email newsletter delivered for you with fresh and exciting travel products to inform and entice your customers. Every newsletter features your own logo, contact details and links back to your own website. This combination of website, email newsletter and CRM system is a powerful marketing program, and best of all, it's done for you. All you have to do is concentrate on building your database, and we'll do the rest.

Cruise Search & Live Booking Capability

Along with your own website featuring information on all travel segments from rail to tours and latest deals, you will have a comprehensive cruise search with over 19,000 cruises, live pricing and real time booking capability. This incredibly powerful tool will give you the edge in this important and rapidly growing sector of the industry. Your customers can research all the major cruise lines of the world, compare pricing and reserve a cabin, all from your website. And of course, any online bookings originating from your site are directed back to you.
