

PRODUCT ANNOUNCEMENT

Date: June 12, 2018
Subject: VALIDATE® GC1 for Siemens Dimension Vista (Order Number: 1100sv)

Dear Customer,

As a user of a Siemens Dimension Vista® analyzer, we would like to inform you about the release of a new product configuration: VALIDATE® GC1 (1100sv). This product is an alternative to the previously recommended 1000sd SKU and is specifically designed to eliminate the measurement errors that sometimes occur when performing linearity and calibration verification on the electrolytes.

While the analyte and range coverage remains unchanged, this new configuration has a second set of bottles (Set 2 – Chem 17) specific for the evaluation of Sodium (Na), Potassium (K) and Chloride (Cl).

The chart below summarizes the analyte and typical coverage for this new configuration:

Typical Values for 1100sv
